tbitherapy.com/prp

Benefits: Increases brain collagen, activates and targets stem cells, increases angiogenesis, decreases inflammation, reduces b-amyloid proteins (that result in memory loss), increases brain glucose utilization, increases neurogenesis, decreases cortisol

IV Myers with Glutathione and Vitamin C

tbitherapy.com/cellular-nutrition

Benefits: Improves metabolic activity and detoxification, reduces inflammation

WAVi Scan

tbitherapy.com/wavi-scan-description

Benefits: Combines brain measurements with standard assessments. While not intended to be a diagnosis, the WAVi report gives you a snapshot of your brain function and to track brain performance over time.
