Regenerative Therapy for Brain Injury

## AMP-TBI Scoring

Calculated using the AMP Recover Application. See <https://www.amprecover.com/>

This is a quantitative measure of the patient's severity of their post-concussive state compiled from data using the Intake Questionnaire, WAVi scan, cognitive and psychological testing (such as PCL-M, SWLS, GAD. -7, PHQ-9 and HITT-6), TBI symptom evaluation, Standardized Assessment of Concussion, and Laboratory with a rating of 0-10.

Rating scale: 0-3 Mild, 3.01 to 5.99 Moderate, 6-10 Moderately severe to Severe TBI

Any patient with an AMP-TBI score of greater than 5.99, designating them with a moderately severe to severe TBI, shall be excluded from the study.
