

TBI Therapy Provider Pre-Training

All practitioners involved must familiarize themselves with the treatment modalities by watching TBI Therapy webinars (<https://tbitherapy.com/webinars/>) and reviewing all treatment links on tbitherapy.com to be able to explain the treatments to patients as well as understand the research, contraindications, case studies, latest research, etc.

Practitioners must review the following documents and links before treating TBI patients:

- a. TBI Therapy Treatment Modalities: Principles and Practice on <https://tbitherapy.com/training/>
- b. Theoretical Framework by Sam Peterson: [A Theory on The Mechanisms of Traumatic Brain Injury and a Potential Treatment Protocol](#)
- c. [Ketogenic Diet](#) by Dr. Scott Sherr
- d. TBI Therapy Veteran Clinical Case studies and flyer: <https://tbitherapy.com/veteran-clinical-case-studies/>. Practitioners may want to print flyer for patients—see link for flyer on same page
- e. “Can Hyperbaric Oxygen Heal Your Brain?” study by Dr. Paul Harch: <https://tbitherapy.com/can-hyperbaric-oxygen-heal-your-brain/>
- f. Read the approved US Patent from John Hughes: US10130657B2 at <https://patents.google.com/patent/US10130657B2/en>
- g. Multimodal Regenerative Approach to TBI Presentation: <https://tbitherapy.com/multimodal-regenerative-approach-tbi/>
- h. Neurobiochemical Cascade in TBI Presentation: <https://tbitherapy.com/neurobiochemical-cascade-in-tbi-ptsd-beneficial-effects-of-oxygen-and-serotonin/>
